Skills

PROGRAMMING LANGUAGES

- SQL
- C++
- Python

CLOUD AND DATA ENGINEERING

- Microsoft Azure
- Azure Data Factory (ADF)
- PySpark
- Spark
- Databricks
- Azure SQL Database
- Azure Data Lake Storage (ADLS)

ORACLE FUSION FINANCIALS

- Accounts Payable (AP)
- Accounts Receivable (AR)
- General Ledger (GL)
- Fixed Assets (FA)
- Cash Management (CM)
- Procure-to-Pay (P2P)
- Order-to-Cash (O2C)

TOOLS AND PLATFORMS

- E-Brands Domain Management
- GitHub
- Microsoft Power Platform
- Power Apps

Professional Experience

WizTech Solutions Pvt Ltd

Cloud Engineer

03/2025 – Present | Hyderabad, India

- Developed Azure Data Factory pipelines for an automotive data project, ingesting customer, vehicle, dealership, sales, and service CSV datasets into Azure Data Lake Storage.
- Configured ADF datasets, source and sink mappings, and Copy Data activities to load raw data into the Bronze layer.
- Applied Python and SQL to extract, transform, and validate structured datasets during project development.
- Used Databricks notebooks to clean and transform ingested data, organizing raw and processed datasets into Bronze and Silver layers.
- Verified data loads by checking record counts, reviewing pipeline outputs, and inspecting files in destination storage.
- Investigated ingestion failures and storage access errors by reviewing execution logs, connection settings, and access permissions.
- Tested pipeline configurations through ADF validation and debug runs to identify errors and verify data movement.

PCS Gulf

Cloud Analyst

10/2023 – 02/2025 | Dubai, UAE

- Supported daily Azure cloud operations involving Virtual Machines, Storage Accounts, and related services within an enterprise environment.
- Handled cloud service requests and supported incident troubleshooting and approved production changes in accordance with ITSM processes.
- Assisted in preparing cloud governance documentation covering cost optimization, demand management, and Privileged Access Management (PAM) policies.
- Contributed to Request for Proposal (RFP) documentation for Public Key Infrastructure (PKI) and observability platforms.
- Reviewed server vulnerability reports in Lansweeper to support infrastructure security assessments.
- Used Microsoft Defender Advanced Hunting to support security investigations and assisted with operating system golden image deployment activities.
- Developed Microsoft Power Apps applications for internal data collection and workflow automation, helping reduce manual processing.

Profile Summary

Computer Science graduate with professional experience supporting Azure cloud operations and developing data ingestion workflows using Azure Data Factory, Python, and SQL.

Supported cloud service request resolution, governance documentation, security operations, cost monitoring, and infrastructure management at one of the UAE's largest conglomerates.

Completed professional development programs including IndiaAI Mission's Yuva AI for All and the Dubai Future Foundation's One Million Prompters Program.

- Configured Azure budget alerts to monitor expenditure and notify relevant teams when spending thresholds were reached.
- Reviewed monolithic and microservices-based application architectures and containerization concepts to support cloud migration planning discussions.

Education

BTech: Computer Science Engineering

Dr Vishwanath Karad's MIT World Peace University
07/2019 – 07/2023 | Pune, Maharashtra

Certificates

AZ-900
