PROFILE

Computer Science graduate with professional experience in enterprise multi-cloud environments and hands-on experience in Python development and cloud-native tools.

Contributed to cloud governance, security operations, and infrastructure management at one of the UAE's largest conglomerates.

Recognized across national and international AI programs including India's Future Skills Prime and the Dubai Future Foundation.

EDUCATION

**BTech: Computer Science Engineering,
Dr Vishwanath Karad's MIT World Peace University**

07/2019 – 07/2023 | Pune, Maharashtra

SKILLS

PROGRAMMING LANGUAGE

SQL, C++, Python

CLOUD TECHNOLOGIES

Microsoft Azure, Microsoft Power Platform, Azure Data Factory,

TOOLS AND PLATFORMS

Lansweeper, E-Brands Domain Management

ITSM

Symphony AI

CERTIFICATES

AZ-900

Microsoft Certified: Azure Fundamentals

One Million Prompters Program

By Dubai Future Foundation

Forward Program

Mckinsey Forward Program

Yuva AI For All

Future Skills Prime(IndiaAI Mission)

PROFESSIONAL EXPERIENCE

Wiztech Solutions Pvt LTD, Cloud Analyst

- Tracked resource health using Azure Monitor and Log Analytics.
- Optimized spending using Azure Cost Management and Billing
- Deployed resources efficiently using ARM Templates.
- Worked with Virtual Machines, App Services, and Azure Functions.
- Developed hands-on understanding of data engineering concepts, including data ingestion, transformation, processing, and storage.
- Used Python and SQL for data manipulation, transformation, validation, and analysis.
- Worked with structured datasets and relational databases to perform data extraction, transformation, and loading (ETL).
- Developed understanding of enterprise financial workflows, transaction processing, and accounting processes within Oracle Fusion.
- Gained exposure to Oracle Fusion Financials configuration, master data, and financial reporting concepts.

03/2025 – Present
Hyderabad, India

PCS Gulf (Client: Al Futtaim), Cloud Engineer/Python Developer

- Contributed to cloud governance by assisting in formulation of cost optimization, demand management and PAM Policy documentation along with RFP for PKI and observability platform.
- Gained hands-on exposure on Azure Virtual Machines, Storage Accounts, and core Azure services while supporting enterprise cloud operations.
- Evaluated Microsoft Power Platform capabilities and developed an understanding of its application in enterprise workflow automation.
- Managed enterprise cloud service requests, incident resolution and production change implementation following ITSM processes.
- Assessed server vulnerability reports on Lansweeper, analyzing network protocols including ICMP and Heartbeat.
- Worked with Microsoft Defender's Advanced Hunting capabilities and supported OS golden image deployment processes.
- Built low-code applications using Microsoft Power Apps for workflow automation and internal data collection, reducing dependency on manual processes.

10/2023 – 02/2025
Dubai, UAE

- Studied monolithic and microservices-based containerization approaches to support cloud migration planning discussions.
- Configured budget alerts in Azure to optimize cloud resource expenditure and prevent overruns.
- Used SQL queries and Python scripts to develop automated templates for Azure Virtual Machines and Storage Account provisioning.

PROJECTS

Cloud-based Smart Health Monitoring and Tracking System using Wearable Devices, College Capstone Project

Technologies: IoT, Python, Cloud Computing, GPS

- Designed a cloud-enabled health monitoring solution using wearable IoT sensors.
- Enabled real-time collection of heart rate, SpO₂, temperature, blood pressure, and GPS data.
- Stored health data in the cloud for remote monitoring and analytics.
- Proposed automated alerts for healthcare providers during abnormal health events.
