PROFESSIONAL EXPERIENCE(2.5 YEARS)

Zensar Technologies, Oracle Fusion Financials Functional Consultant

- Functional experience in Oracle Fusion Cloud Financials Modules like AP, AR, GL, FA, CM, implementation and support projects and good knowledge of P2P Cycle, working as an Oracle Fusion Financials Consultant.
- Implemented Financial Applications using AIM and OUM methodologies for crucial business areas in Oracle Fusion Financials.
- Experience in Business Requirement Gathering, Solution Designing, Solution Building, and Testing in all SIT, UAT, etc.
- Experience in writing Functional Design Documents for Custom Applications with integration to Oracle Fusion Applications and other custom applications.
- Involved in Conference Room Pilots (CRPs), User Training, and Post-Go-Live support.
- Proven team player with excellent interpersonal and communication skills, adaptable to changes and new technologies, and quick to learn and observe.
- Expertise in analyzing business requirements for customizations in Oracle Applications implementation, and proficiency in requirement analysis, support, testing, documentation, and design reviews.
- Well versed in preparing and maintaining documentation using Application Implementation Methodology (AIM) such as BR100, MD050, RD020, and TE040, as well as configuration of financial modules.

03/2025 – Present
Hyderabad, India

- Involved in the preparation of RD011-Future Business Process, RD030-Current Business Process, TE025- System Test Scenarios, TE070-System Test Result, and CV027-Data Conversion & MC050 Application Setup Document.
- Adept in anticipating and addressing customer needs and committed to resolving issues, to the satisfaction of all parties involved.
- Knowledgeable in utilizing Oracle Global Support for support application problem resolution and solution identification.
- Focused on maintaining system integrity during Oracle Fusion Quarterly Updates and resolving critical issues via ServiceNow and Oracle Support (SR) management.
- Strategic collaborator capable of finalizing Chart of Accounts (COA) and Enterprise Structures to meet regional statutory and compliance requirements.
- Experienced in streamlining financial operations through Host-to-Host banking communication and automated Asset Lifecycle management.
- Proficient in Data Migration using FBDI and ADFDI templates, alongside managing complex configurations like Intercompany (AGIS).

PCS Gulf (Client: Al Futtaim), Cloud Analyst

08/2023 – 02/2025
Dubai, United Arab
Emirates

- Contributed to cloud governance by assisting in formulation of cost optimization, demand management and PAM Policy documentation along with RFP for PKI and observability platform.
- Explored cloud application development platforms such as Microsoft Power Platform.
- Handled Change Requests, Service Requests and Incident Requests.
- Explored Lansweeper for server vulnerability reporting and learned about protocols such as ICMP and Heartbeat.
- Learnt About Advanced Hunting in Microsoft Defender and OS golden image Deployment.
- Explored low-code/no-code applications using Microsoft Power Apps.
- Gained knowledge of containerization concepts such as monolithic architecture and microservices architecture.
- Assisted by setting budget alerts in Azure to optimize cloud resource expenditures and prevent budget overruns.

PROJECTS

Saudi Bin Ladin Group- Implementation Project

03/2025 – Present

About Client:

Saudi Bin Ladin Group is one of the largest Construction and Real Estate Conglomerates in the Middle east with specialization in Facilities Management and operation and management of unique and exclusive properties.

Roles and Responsibilities:

- Facilitated discovery sessions to understand and gather client requirements.
- Executed implementation activities for Oracle Fusion Financials.
- Conducted detailed requirement studies to document specifications for solution design/CRP, testing, and user training, including data migration and go-live processes.
- Supported business process analysis for AS-IS documentation, performed GAP analysis, developed TO-BE designs, and configured/customized solution processes to align with the product.
- Contributed to the finalization of COA (Chart of Accounts) and Enterprise Structure.
- Managed the configuration of Legal Entities and Primary Ledgers with unique functional currencies to align with Middle Eastern statutory requirements.
- Conducted functional testing of technical solutions provided by the Technical Team, and prepared documents such as RD030, RD011, TE025, AN100 and MC050 and user manuals.
- Led CRP sessions and assisted business users during UAT (User Acceptance Testing).
- Served as the first line of support for end users, managing and following up on service requests with Oracle until resolution and change management.
- Mapped business requirements to Oracle Fusion product functionality.
- Configured the production environment and involved in data conversion.
- Prepared Minutes of Meeting (MOM) documents to capture discussion points and obtained sign-off from the client team.
- Coordinated support for period-end closing processes in Financials modules.
- Configured Intercompany (AGIS) accounting flows to streamline transactions between diverse business units within the conglomerate.
- Assisted in the configuration of Oracle Fusion Tax (ZXR) to meet regional compliance requirements for Middle Eastern operations.
