Skills

PROGRAMMING LANGUAGE

- SQL
- C++
- Python

CLOUD AND DATA ENGINEERING

- Microsoft Azure
- Azure Data Factory (ADF)
- Azure SQL Database
- Azure Storage Accounts
- Azure Data Lake
- ETL Pipelines
- Data Ingestion and Data Transformation
- Cloud Governance.

TOOLS AND PLATFORMS

- Lansweeper
- E-Brands Domain Management
- Github
- Microsoft Power Platform
- Power Apps
- Azure Monitor
- Log Analytics

Professional Experience

Wiztech Solutions Pvt LTD

Cloud Analyst

03/2025 – Present | Hyderabad, India

- Supported Azure cloud operations by monitoring resource health and performance using Azure Monitor and Log Analytics.
- Worked with Azure Cost Management and Billing to analyze and optimize cloud resource expenditure.
- Assisted with Azure resource provisioning and deployment using ARM Templates, following standardized deployment practices.
- Gained hands-on experience with core Azure services, including Virtual Machines, App Services, and Azure Functions.
- Developed practical understanding of data engineering workflows, including data ingestion, transformation, processing, storage, and ETL.
- Applied Python and SQL to structured datasets for data extraction, transformation, validation, and analysis across data workflows.
- Developed understanding of enterprise financial workflows, transaction processing, and accounting processes within Oracle Fusion.
- Developed an understanding of enterprise financial workflows, transaction processing, and accounting processes within Oracle Fusion.
- Gained exposure to Oracle Fusion Financials configuration, master data management, and financial reporting concepts.
- Gained familiarity with Oracle Fusion Financials business processes supporting enterprise finance operations.
- Developed an understanding of financial master data and its role in transaction processing and financial reporting.

PCS Gulf (Client: Al Futtain)

Cloud Engineer/Python Developer

10/2023 – 02/2025 | Dubai, UAE

- Contributed to cloud governance by assisting in formulation of cost optimization, demand management and PAM Policy documentation along with RFP for PKI and observability platform.
- Gained hands-on exposure on Azure Virtual Machines, Storage Accounts, and core Azure services while supporting enterprise cloud operations.
- Evaluated Microsoft Power Platform capabilities and developed an understanding of its application in enterprise workflow automation.

Profile Summary

Computer Science graduate with professional experience in enterprise multi-cloud environments and hands-on experience in Python development and cloud-native tools.

Contributed to cloud governance, security operations, and infrastructure management at one of the UAE's largest conglomerates.

Recognized across national and international AI programs including India's Future Skills Prime and the Dubai Future Foundation.

- Managed enterprise cloud service requests, incident resolution and production change implementation following ITSM processes.
- Assessed server vulnerability reports on Lansweeper, analyzing network protocols including ICMP and Heartbeat.
- Worked with Microsoft Defender's Advanced Hunting capabilities and supported OS golden image deployment processes.
- Built low-code applications using Microsoft Power Apps for workflow automation and internal data collection, reducing dependency on manual processes.
- Studied monolithic and microservices-based containerization approaches to support cloud migration planning discussions.
- Configured budget alerts in Azure to optimize cloud resource expenditure and prevent overruns.
- Used SQL queries and Python scripts to develop automated templates for Azure Virtual Machines and Storage Account provisioning.

Education

BTech: Computer Science Engineering

Dr Vishwanath Karad's MIT World Peace University
07/2019 – 07/2023 | Pune, Maharashtra

Certificates

AZ-900

Microsoft Certified: Azure Fundamentals

One Million Prompters Program

By Dubai Future Foundation

Forward Program

Mckinsey Forward Program

Yuva AI For All

Future Skills Prime(IndiaAI Mission)

Projects

Cloud-based Smart Health Monitoring and Tracking System using Wearable Devices

College Capstone Project

Technologies: IoT, Python, Cloud Computing, GPS

- Designed a cloud-enabled health monitoring solution using wearable IoT sensors.
- Enabled real-time collection of heart rate, SpO₂, temperature, blood pressure, and GPS data.
- Stored health data in the cloud for remote monitoring and analytics.

- Proposed automated alerts for healthcare providers during abnormal health events.
